**VER-A-TEMP™ INCREASES SANITATION AND SAFETY
FOR RESTAURANTS, HOTEL/MOTEL, AND HEALTHCARE FACILITIES**

Dallas, TX (May 5, 2007) – National Hot Water announces the release of the **Ver-A-Temp™ water temperature sensor**. Developed exclusively for National Hot Water, Ver-A-Temp™ monitors water heating application outgoing water temperatures and alerts to temperature drops.

Designed to ensure the sanitation and food safety needs of restaurants, hotel/motel, and healthcare facilities, Ver-A-Temp™'s patent-pending technology verifies that water temperatures for sanitizing equipment (dishwashers, ware washers, and glass washers) and other temperature-specific requirements for restrooms, food prep areas, and laundry rooms remain within a safe and effective range.

Ver-A-Temp™ is equipped with two monitoring options: on-site or remote. On-site monitoring utilizes a warning light located within the facility (i.e. kitchen or equipment room) to alert facility staff to temperature drops below the acceptable range. The remote monitoring option sends an automated alarm through existing telephone lines to National Hot Water's 24/7 Call Center where call center staff can quickly notify facility maintenance staff and/or dispatch emergency service if required.

The Ver-A-Temp™ water temperature sensor can be installed in the piping as a whole system monitor or individual equipment monitor. Its low profile, straightforward design allows for easy retro-fit to existing applications. Randy Meyer, vice president of national accounts for National Hot Water commented, "We saw a need for more proactive safeguards for water temperature, especially for food safety and sanitation temperature requirements. We designed the Ver-A-Temp as a cost-effective way to monitor the reliability of water heating equipment for specific temperature requirements.

National Hot Water, the national account division of National Wholesale Supply, Inc., provides sales, service and technical support for water heating applications, customized water softening solutions, water filtration equipment, geothermal systems, ac/dehumidification systems and more. With the industry's largest nationwide network of certified plumbing/HVAC contractors, National Hot Water provides coast to coast, 24/7 service to handle emergency repairs and replacement, scheduled maintenance and new installation for the restaurant,

hotel/motel and healthcare industries. Call toll-free 888-444-4435 for more information.
